Circular Glass Cabin Lift

AL-PLATFORMLIFTS.CO.UK

The elegance of round shapes.

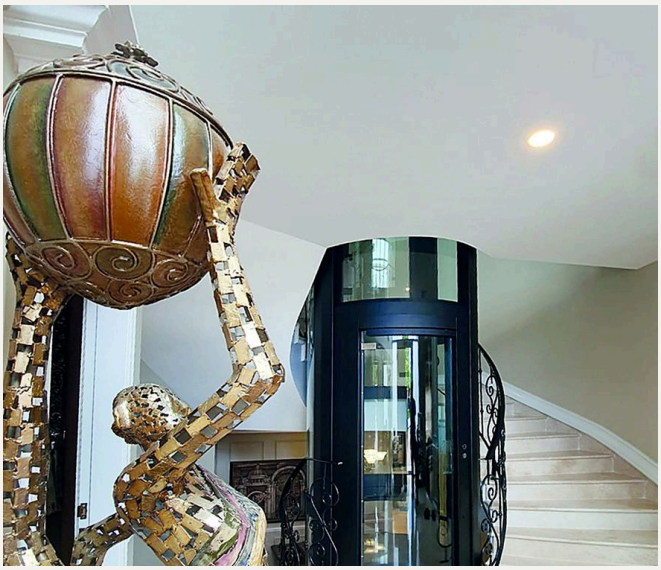
The APL Circular Glass Cabin Lift is designed to be seen. Its curved glass, slim powder-coated frame and round cabin enhance the architecture around it, turning the lift into a real piece of furniture at the heart of a staircase or hallway.

300kg	3 sizes	150mm	2,350mm
PER M² OF PLATFORM	Ø1,300–1,600MM	PIT	MINIMUM HEADROOM

CURVED FULL-GLASS DOORS

The doors follow the curve of the cabin, so the lift reads as one clean glass cylinder from every angle.

A centrepiece for the home



Hallways

A panoramic lift that greets guests as they arrive and adds value to the home.

Round stairwells

Ideal in a central position inside a round stairwell, with the stair wrapping around the lift.

Day and night

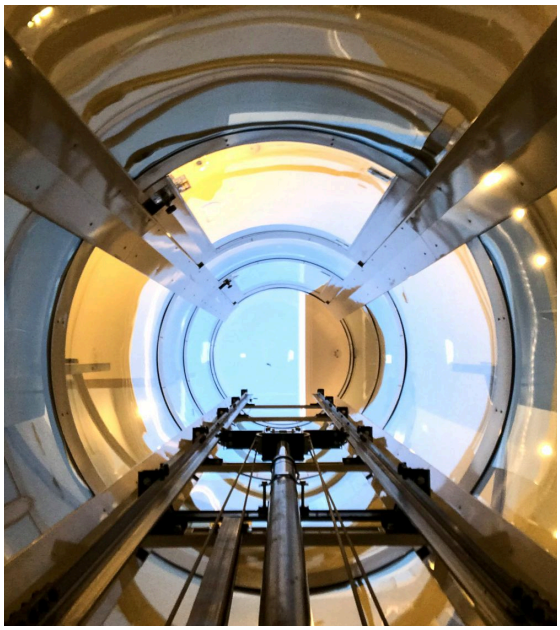
Cabin lighting turns the lift into a lantern at the heart of the house after dark.

A flush finish

The round cabin sits neatly in the floor, with just a 150mm pit.

A private family home

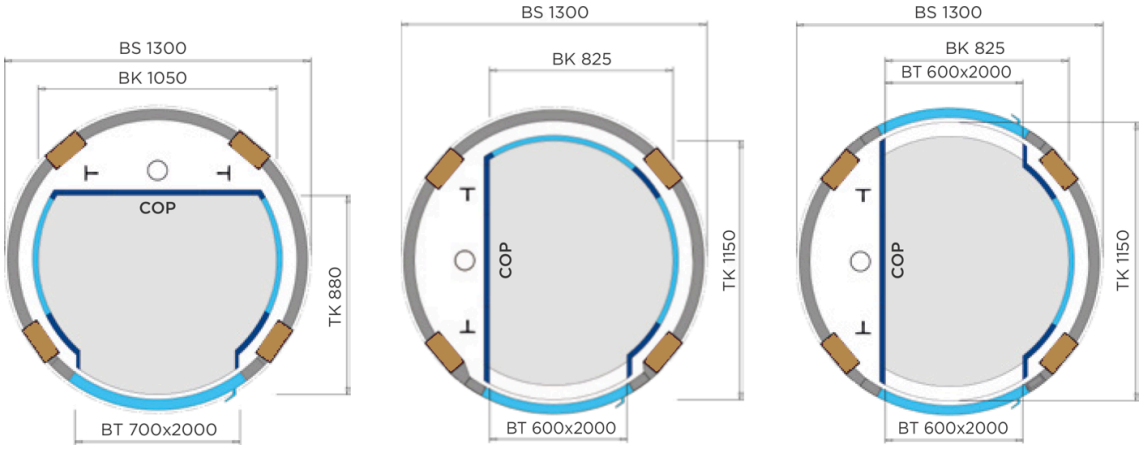
A circular glass cabin lift we installed at the centre of a family home, linking the hallway to the landings above beneath a roof light.



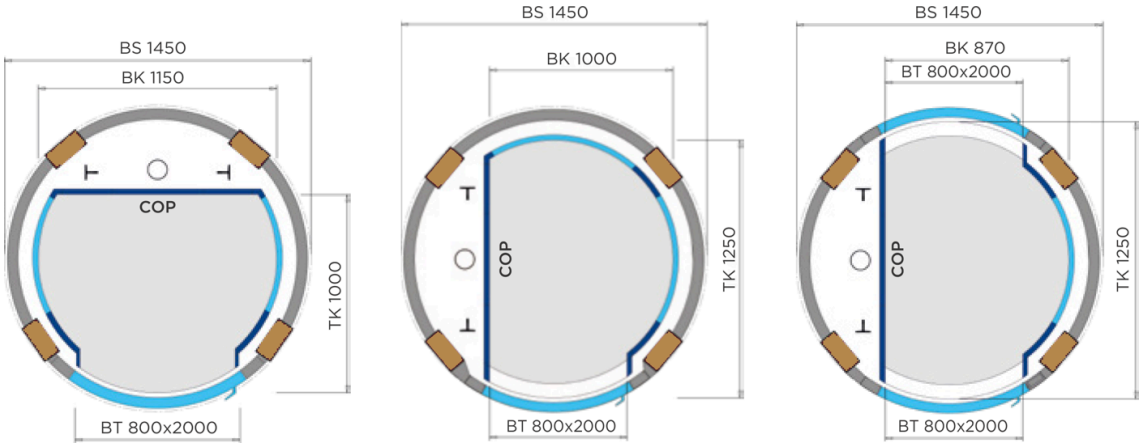
Three sizes, three layouts

SINGLE, REAR WALL | SINGLE, SIDE WALL | THROUGH ENTRY

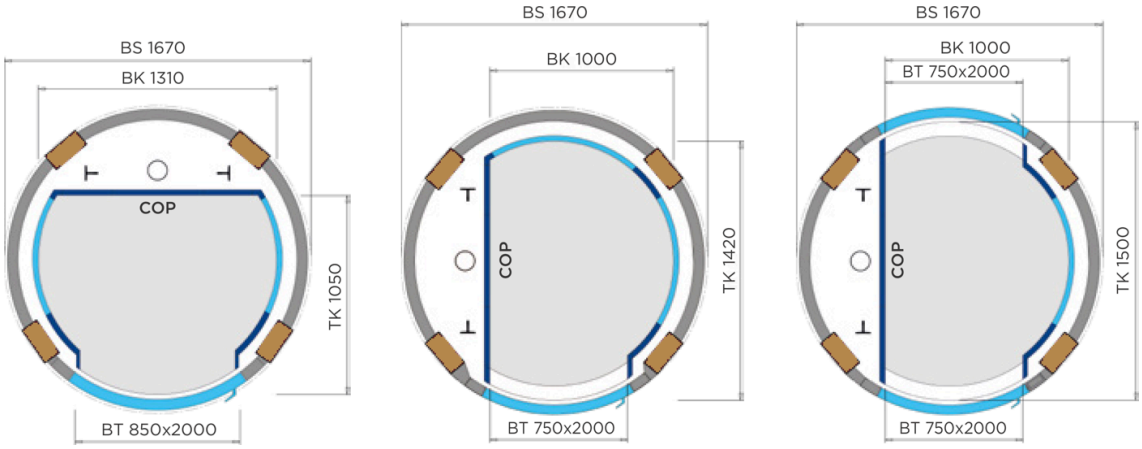
Ø1,300MM



Ø1,450MM



Ø1,600MM



- Glass cladding to the structure
- Metal structure
- Flat control panel wall
- Curved glass cabin walls

BS structure diameter **BK** cabin width
TK cabin depth **BT** door width x height
COP control panel

Glass, curves and quiet confidence

01

Curved full-glass doors

Doors that follow the round cabin, in widths from 600mm to 850mm depending on size and layout.

02

Glass all round

Curved glass cabin walls and glass cladding for a fully panoramic lift.

03

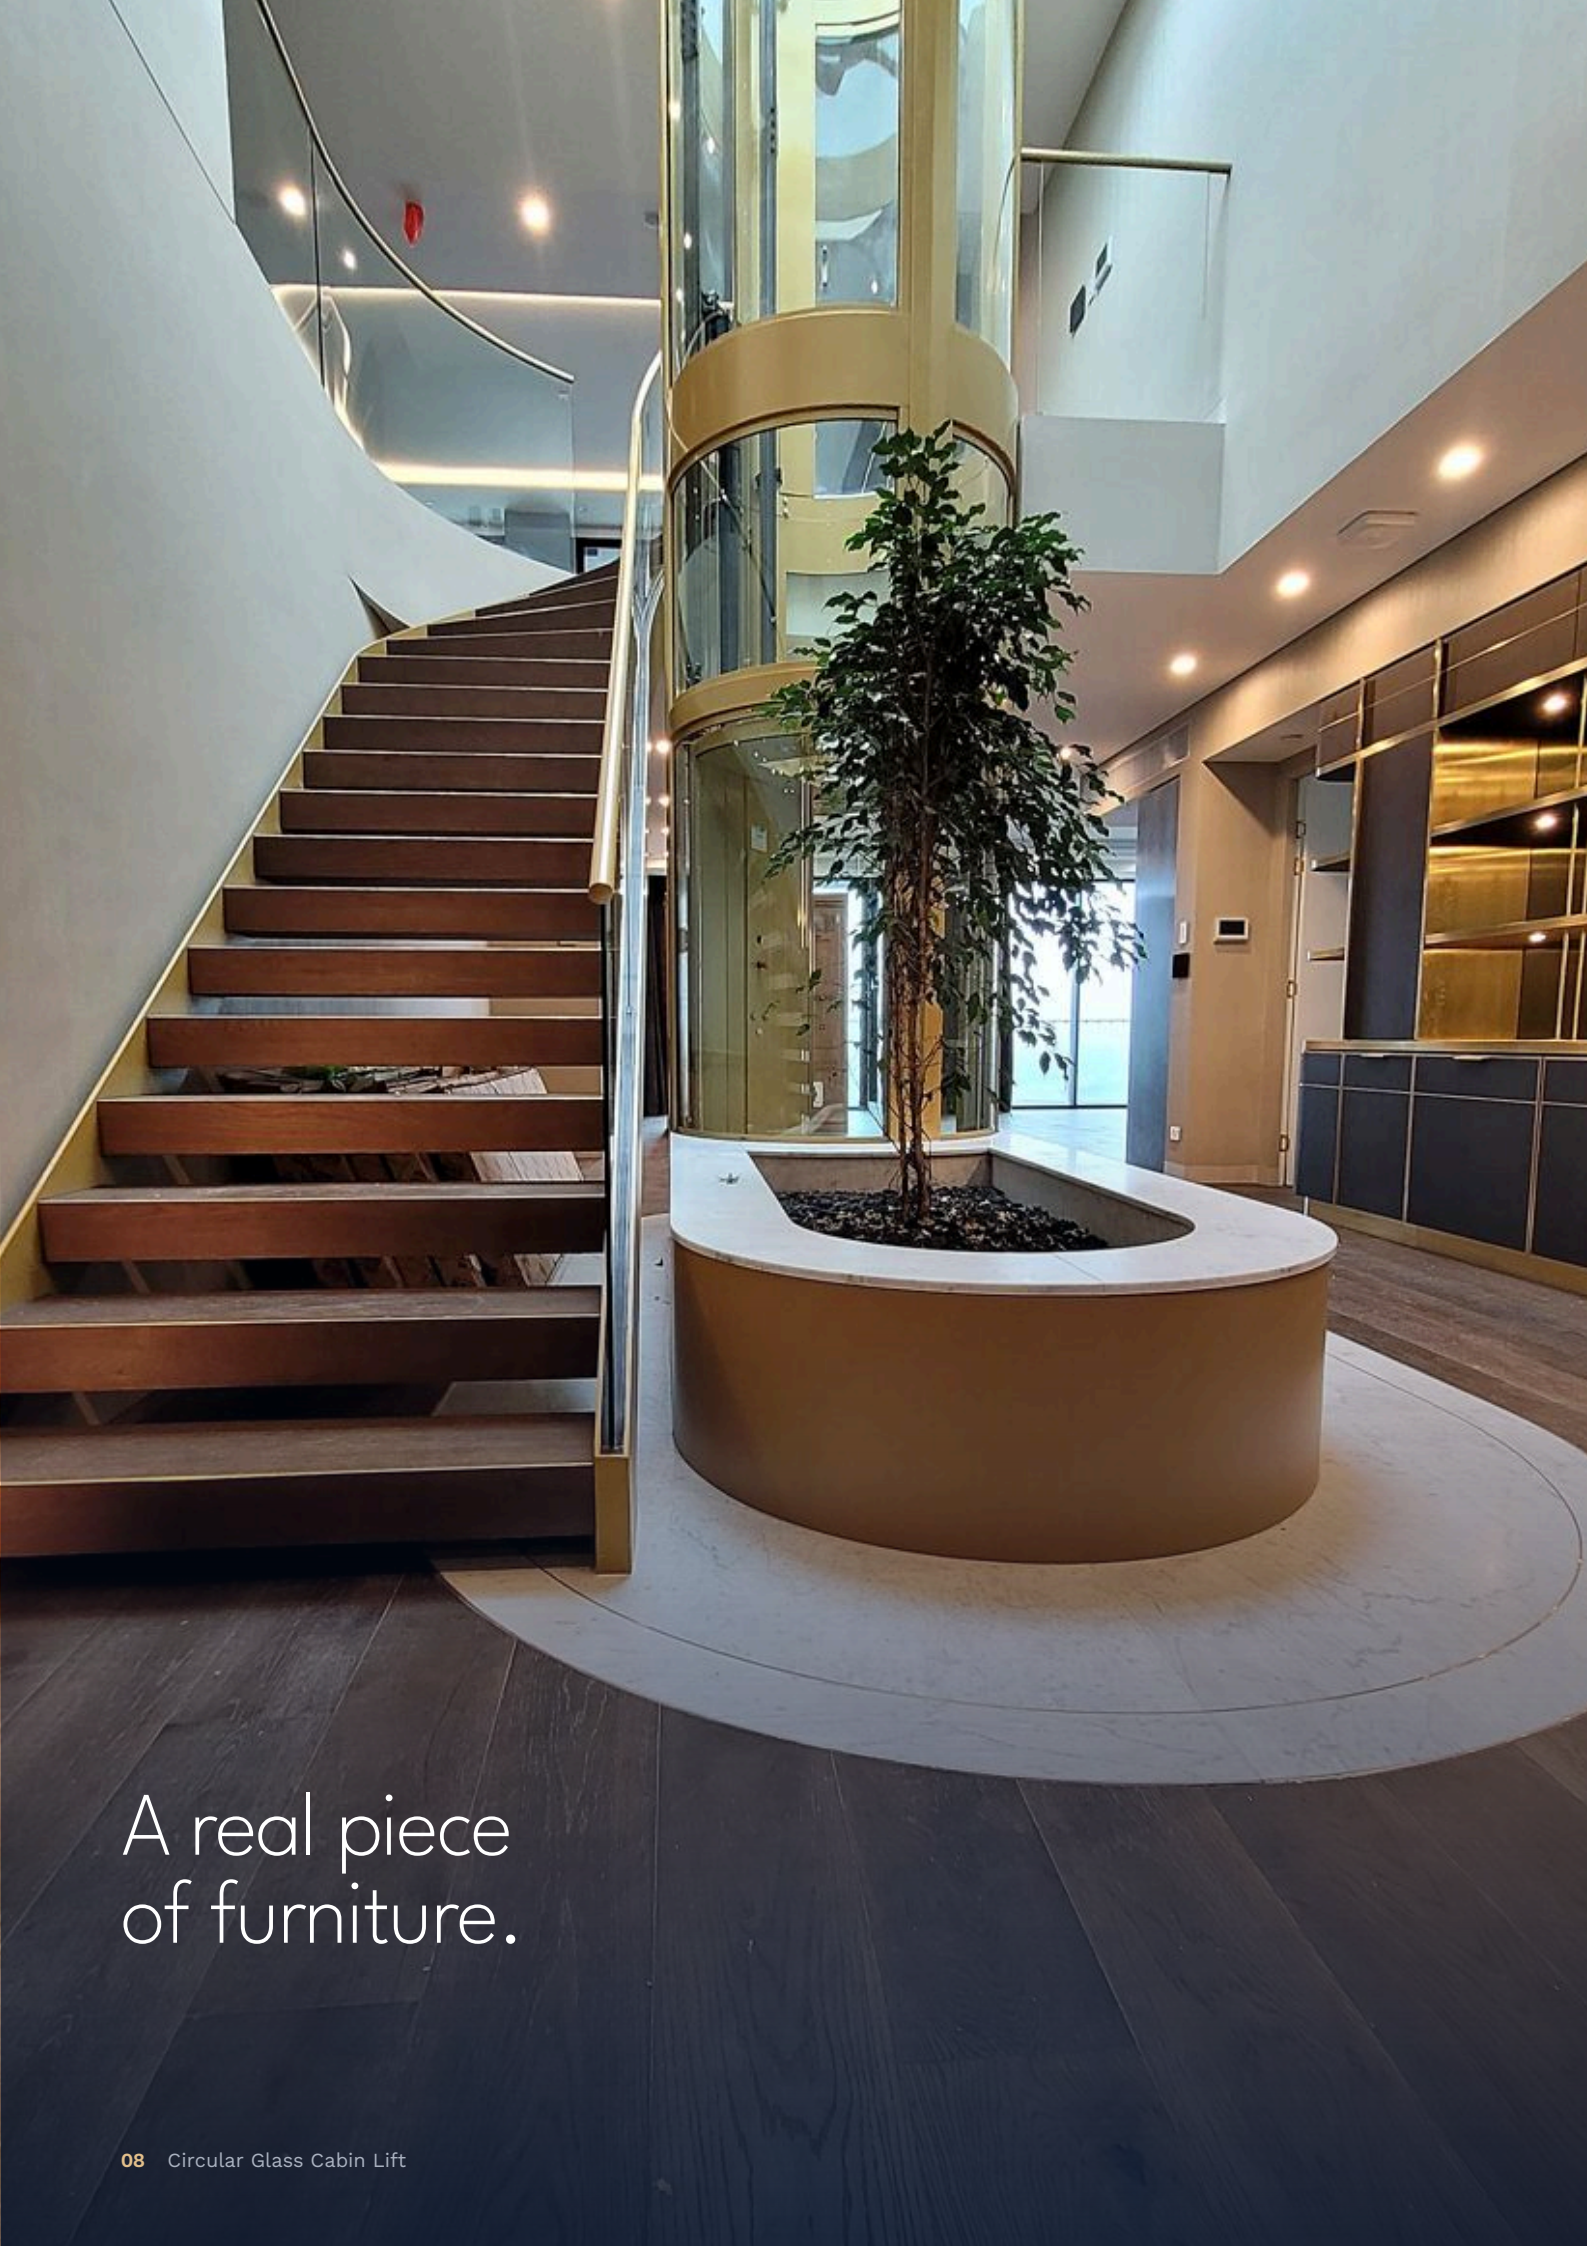
Powder-coated frame

A slim powder-coated metal frame, finished to suit the interior.

04

Fixed to the building

The structure is fixed back to the building, centred in a round stairwell or set against a wall.



A real piece of furniture.

At a glance

Lift type	Round glass cabin lift for homes and public places
