

# APL8 Screw Drive Platform Lift

# Meet the APL8

The APL8 Screw Drive Platform Lift is designed and built in the UK. Using an ultra-reliable and low-maintenance self-sustaining nut and screw drive system, the APL8 is robust, reliable, and engineered to the highest quality.

The APL8 is designed and built with a range of standard sizes for building regulation compliance. However, it can be made with bespoke sizes, custom finishes, and configured to suit almost any application.

With minimal building requirements and our innovative modular design, the APL8 is the perfect choice to make your building accessible for everyone.
