Glazed Circular Lift

AL-PLATFORMLIFTS.CO.UK

The elegance of round shapes.

The APL Glazed Circular Lift is designed to be seen. Its curved glass, slim powder-coated frame and round cabin enhance the architecture around it, turning the lift into a real piece of furniture at the heart of a staircase or hallway.

300kg

PER M² OF PLATFORM

3 sizes

Ø1,300–1,600MM

150mm

PIT

2,350mm

MINIMUM HEADROOM

CURVED FULL-GLASS DOORS

The doors follow the curve of the cabin, so the lift reads as one clean glass cylinder from every angle.

A centrepiece for the home

Hallways

A panoramic lift that greets guests as they arrive and adds value to the home.

Round stairwells

Ideal in a central position inside a round stairwell, with the stair wrapping around the lift.

Day and night

Cabin lighting turns the lift into a lantern at the heart of the house after dark.

A flush finish

The round cabin sits neatly in the floor, with just a 150mm pit.

A private family home

A glazed circular lift we installed at the centre of a family home, linking the hallway to the landings above beneath a roof light.

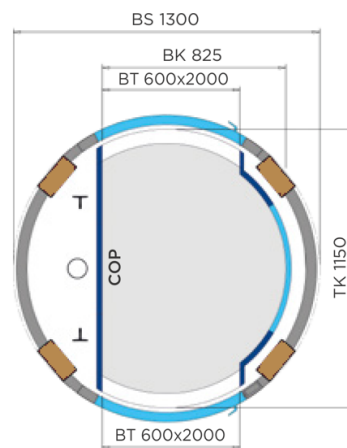

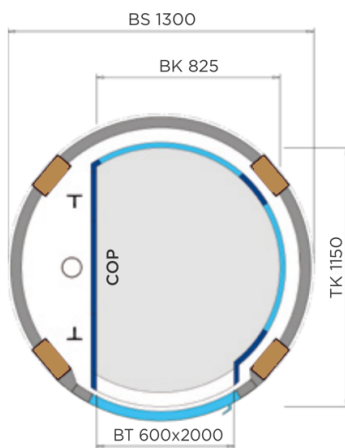

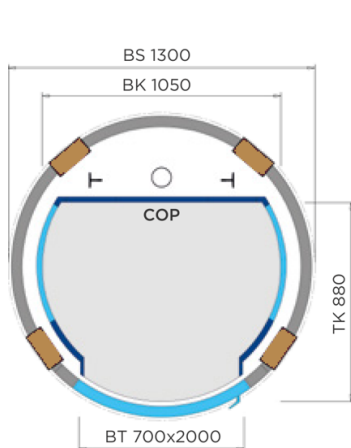

Three sizes, three layouts

SINGLE, REAR WALL

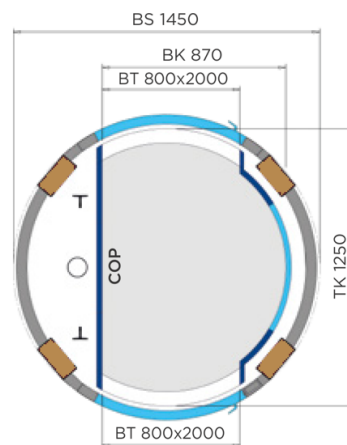

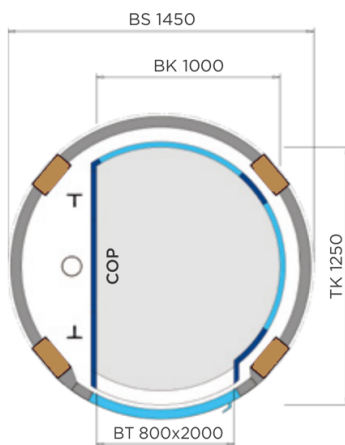

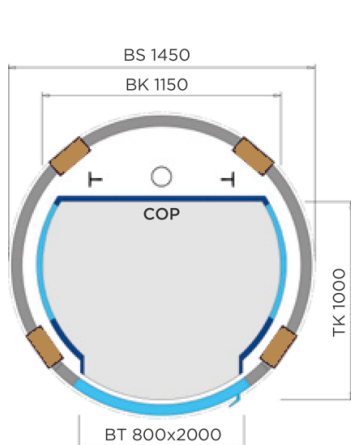

SINGLE, SIDE WALL

THROUGH ENTRY

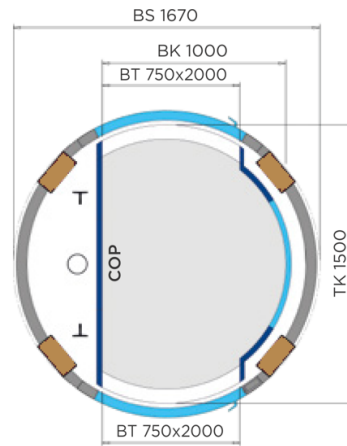

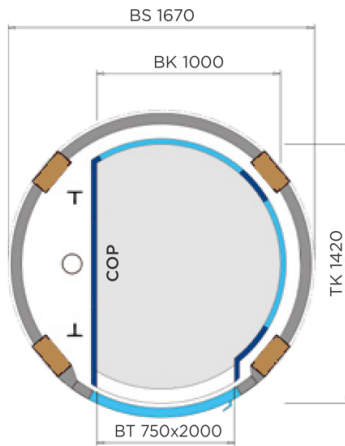

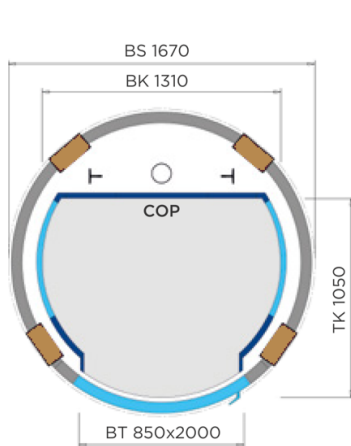

Ø1,300MM

Ø1,450MM

Ø1,600MM

- Glass cladding to the structure
- Metal structure
- Flat control panel wall
- Curved glass cabin walls

BS structure diameter **BK** cabin width
TK cabin depth **BT** door width x height
COP control panel

Glass, curves and quiet confidence

01

Curved full-glass doors

Doors that follow the round cabin, in widths from 600mm to 850mm depending on size and layout.

03

Powder-coated frame

A slim powder-coated metal frame, finished to suit the interior.

02

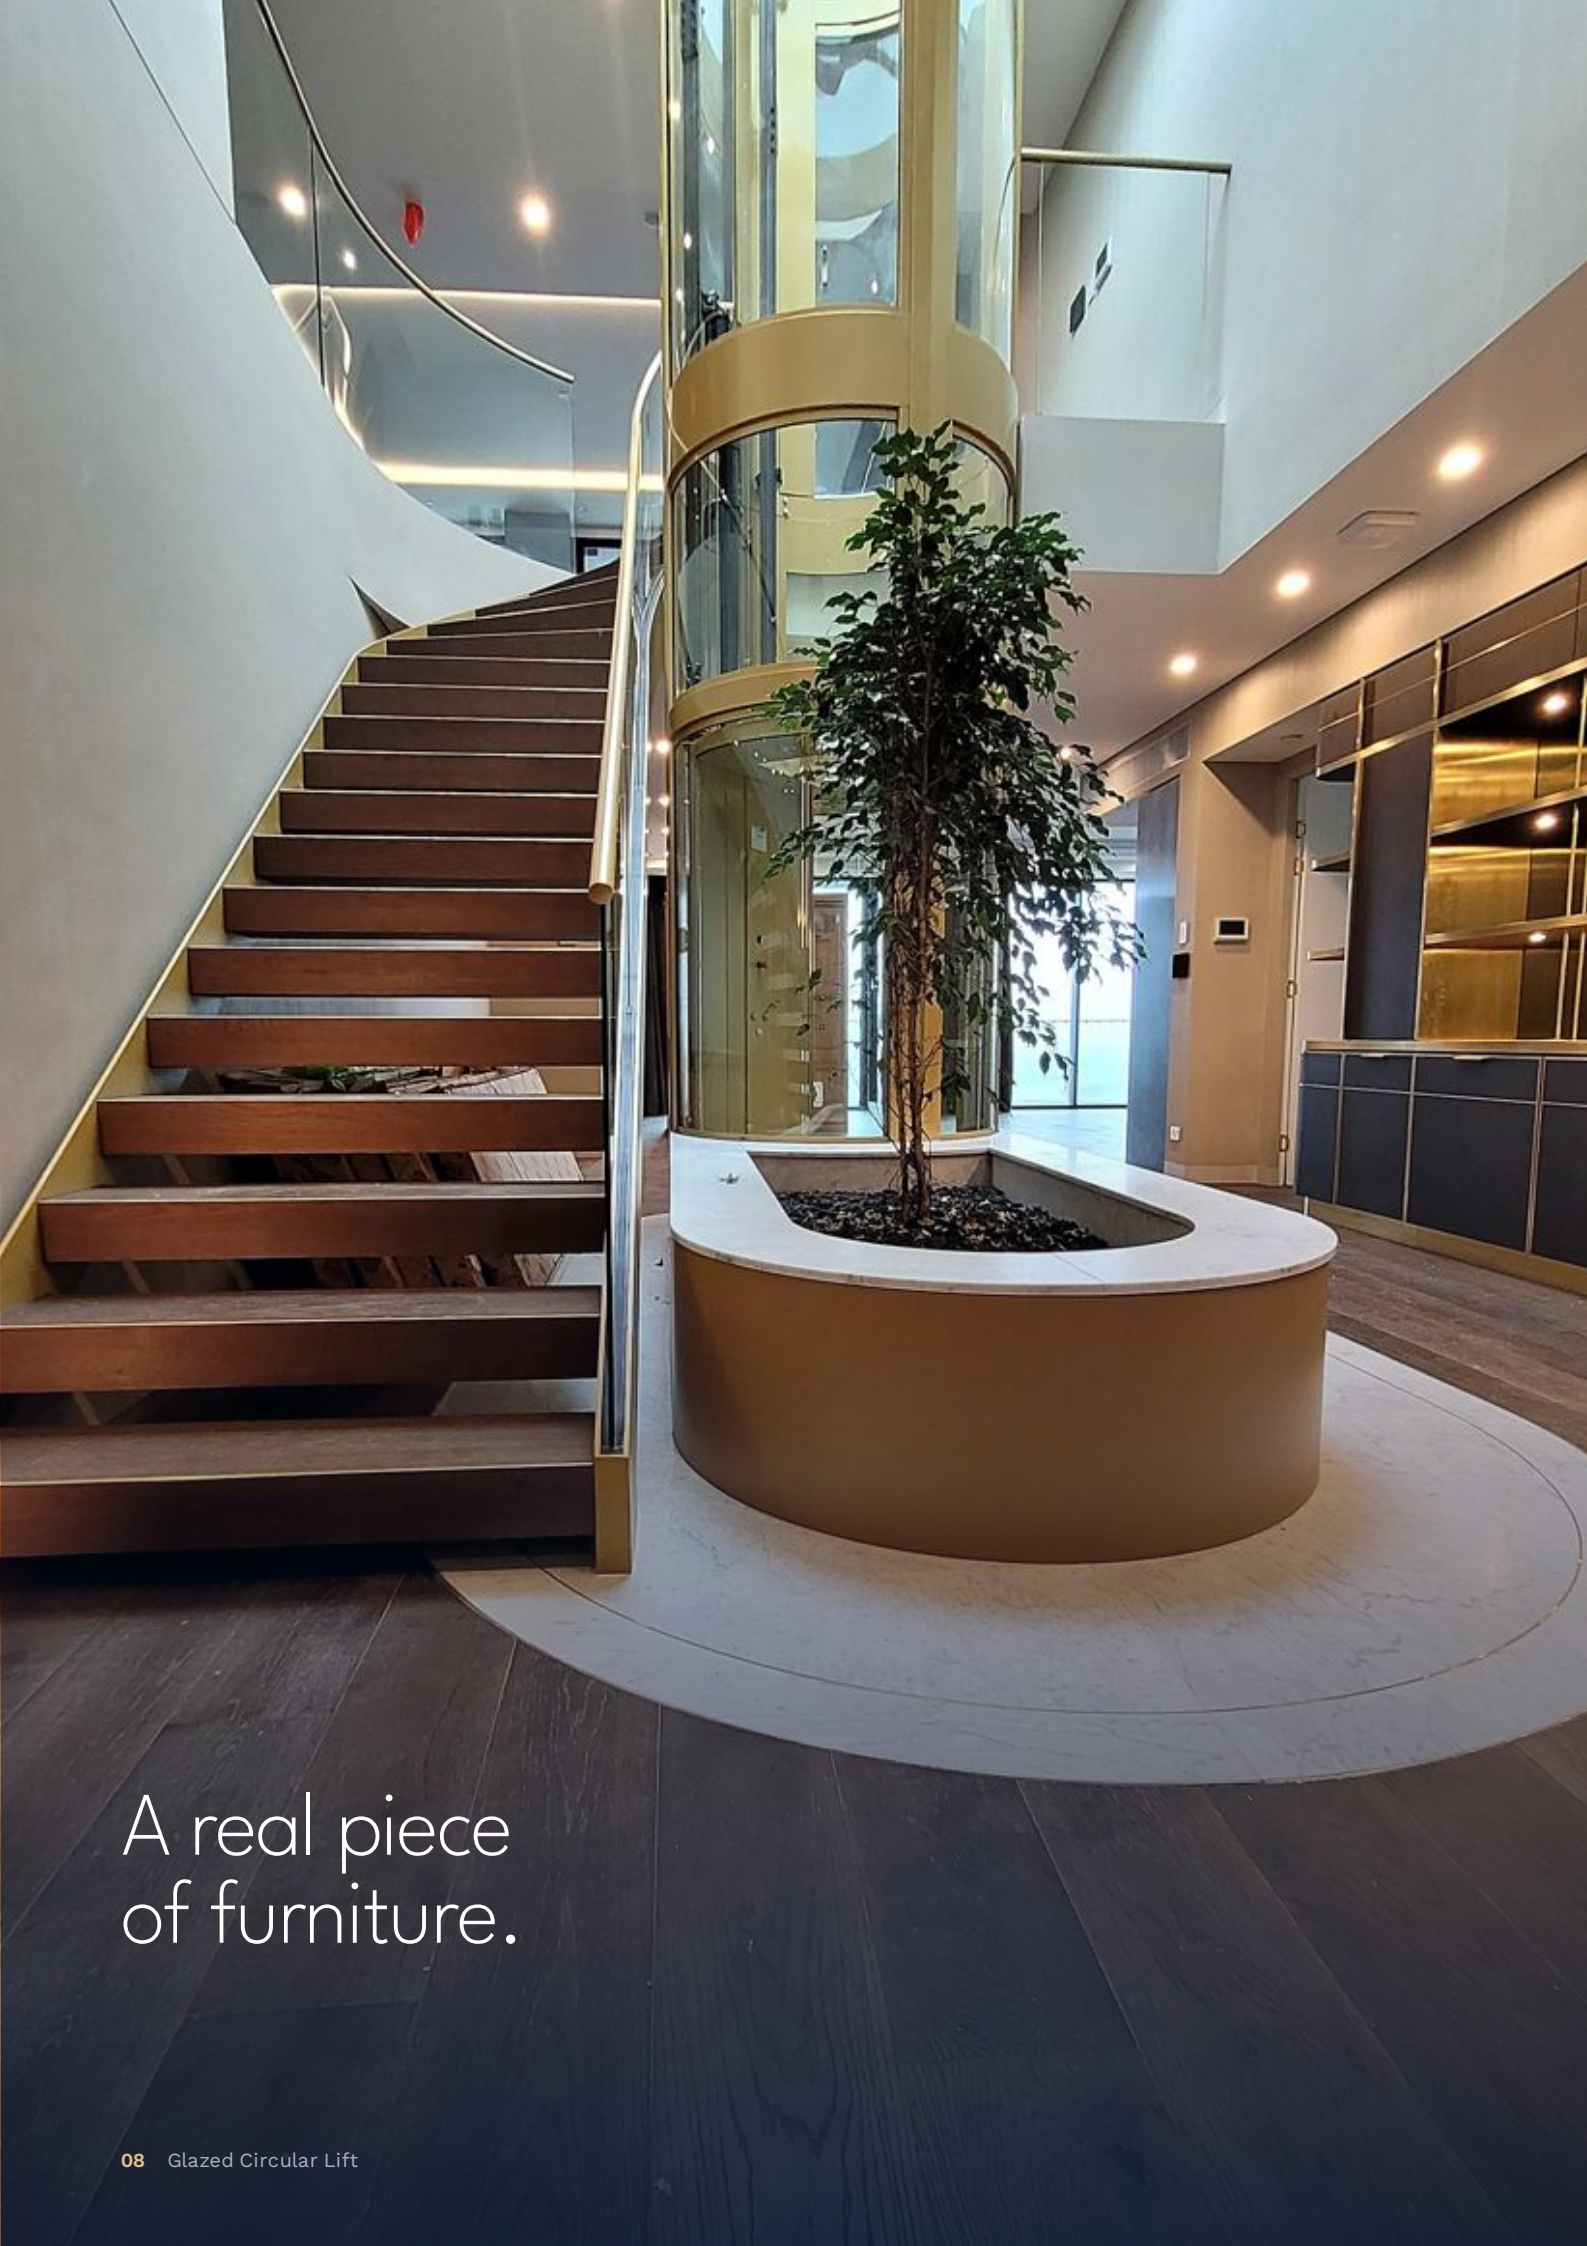

Glass all round

Curved glass cabin walls and glass cladding for a fully panoramic lift.

04

Fixed to the building

The structure is fixed back to the building, centred in a round stairwell or set against a wall.

A real piece
of furniture.

At a glance

Lift type	Round glazed lift for homes and public places
Compliance	Machinery Directive 2006/42/EC
Rated load	300kg per m ² of platform area
Speed	0.15m/s

CABIN AND DOOR SIZES (MM)

Size	Single, rear wall	Single, side wall	Through entry
Ø1,300	Cabin 1,050 x 880 Door 700	Cabin 825 x 1,150 Door 600	Cabin 825 x 1,150 Door 600
Ø1,450	Cabin 1,150 x 1,000 Door 800	Cabin 1,000 x 1,250 Door 800	Cabin 870 x 1,250 Door 800
Ø1,600 (structure 1,670)	Cabin 1,310 x 1,050 Door 850	Cabin 1,000 x 1,420 Door 750	Cabin 1,000 x 1,500 Door 750

Cabin sizes are width x depth. All doors are 2,000mm high.

From survey to handover

01

Survey

We visit, measure and advise on the best position and size.

02

Drawing

A site-specific drawing and builder's work list for sign-off.

03

Install

Our team installs and tests the lift in place.

04

Handover

Testing, training and ongoing service.

BUILDER'S WORK

Pit	150mm
Headroom	2,350mm minimum above the top floor
Footprint	Structure diameter of 1,300, 1,450 or 1,670mm
Fixings	Structure fixed back to the building at each floor
Power	Single-phase supply

Part of the
architecture, not
an addition to it.

Every APL Glazed Circular Lift is surveyed and drawn for your building, installed under our projects team and looked after through our nationwide service network.
